### EXPERIENCE

#### Head of Software Department

Alhayat.sa

2024 - Present

Developed a medical platform in Saudi Arabia for Al-Hayat Medical Group, established in 2005, operating 5 branches and serving over 13 million patients annually.

- Built a fully customized CRM system for call center and marketing teams to manage leads, customers, and follow-ups efficiently.
- Designed and optimized call center workflows to improve response time, productivity, and conversion rates.
- Developed a real-time call center dashboard to track agents, live calls, performance metrics, and KPIs.
- Built an AI voice agent capable of handling live calls with users in Arabic using TTS, understanding user intent, and taking automated actions.
- Implemented AI-driven call handling to schedule new appointments automatically based on user interactions.
- Integrated WhatsApp Business API with AI capabilities to interact with users, answer inquiries, and automatically create or update appointments.
- Built a new user-facing application and responsive website to enhance customer engagement and experience.
- Ensured seamless system integration across backend services, APIs, AI components, and third-party platforms.
- Developed a real-time Call Center Dashboard to monitor live calls, agent activity, performance metrics, analytics.
- Built an AI Call Agent capable of handling inbound and outbound calls in Arabic using AI, speech recognition, and TTS, understanding user intent, and automating actions such as appointment scheduling and updates.

## Senior Full Stack PHP/Laravel Developer

2021 - 2023

Shaghf.sa

Developed a revolutionary eCommerce startup enabling merchants to build long-lasting customer relationships.

- Set up CI/CD pipelines incorporating essential stages such as linting, static analysis, and testing.
- Deployed staging instances on the platform Contabo and production on AWS.
- Seamlessly integrated third-party services and APIs to enhance web-based systems.
- Developed a Nuxt.js frontend with a Laravel backend as API and GraphQL.

## Software Developer

2019 - 2021

M6wer.com

Worked on developing cutting-edge innovations in the world of audio on the web.

- Focused on crafting resilient and high-performing server-side solutions tailored to power dynamic web applications.
- Integrated third-party services and APIs to elevate web applications' functionality.
- Developed cutting-edge innovations in audio for the web.
- Developed real-time chat and location tracking features for a driver's app.

## Full Stack Developer

2018 - 2019

Freelancer

Architected and developed web-based applications from scratch.

- Built user-friendly interfaces and integrated essential functionalities.
- Developed a POS system with touchscreen capabilities, receipt printers, and cash drawer management.
- Effectively communicated with clients to gather requirements and provide project updates.
- Skilled in software integrations, adept at seamlessly integrating third-party services and APIs to enhance the functionality and efficiency of web applications.
